

Alexandria Sanitation Authority Environmental Policy Statement

It is the policy of the Alexandria Sanitation Authority to conduct our work in an environmentally sustainable manner. We are committed to continually monitoring and reducing our environmental impacts on our neighbors and world at large.

We pledge to consistently deliver exceptional public service to our customers and the community by optimizing our environmental and business performance as we strive to reduce our ecological footprint.

In carrying out this policy, we will:

- Operate in a manner that prevents pollution and minimizes adverse impacts on the environment.
- Work together to create a clean, healthy and safe work environment
- Comply with and strive to surpass, all applicable environmental, health and safety laws and regulations.
- Commit to following the principles of conduct set forth in the NBP Code of Good Practice and the VBC Code of Good Practices.
- Implement and continually improve the ASA Environmental Management Systems and develop and periodically review environmental objectives.
- Seek the commitment of our employees for environmental stewardship through communication, education and recognition.
- Make this policy available to our external partners, community members and general public.
- Serve as a role model and leader for other wastewater utilities in environmental preservation.

Adherence to these principles will help us fulfill our mission of protecting the environment for today and tomorrow.
